EDUCATION

Santa Clara University

Santa Clara, CA

Bachelor of Science, Electrical and Computer Engineering

Sept. 2022 – Jun. 2025

- Cumulative GPA: 3.4
- Association of Computational Machinery, Institute of Electrical and Electronics Engineers
- Relevant course work – Computer Architecture, Operating Systems, Real-Time Embedded Systems, Data Structure, Differential Equations, Discrete Mathematics, Linear Algebra, Logic Design, Microprocessor Design, and Probability & Statistics

SKILLS

Programming Languages: Python, Dart & Flutter, C/C++, Verilog, Assembly, JavaScript, HTML/CSS, R

Developer Tools: Git, Pycharm, VS Code, Google Cloud Platform

Spoken Language: English, Mandarin, Spanish

PROJECTS

Front End Team Lead | *Inrix Hackathon/PB&J*

Nov. 2023 – Nov. 2023

- Won Inrix's annual hackathon at Santa Clara with a full service app that guides the user from driving, parking, and transit to the final destination in a one stop shop app
- Full stack development of front end UI as well as backend server bridging using Dart & Flutter
- Bridged server side calls with client side using asynchronous structure and REST API

Full Stack App Developer | *The Marina Project*

Dec. 2023 – Jan. 2023

- Developed a full stack app from scratch using the Flutter framework for iOS and Android, to curate music for users based on their geographic location
- Used a dozen asynchronous REST APIs in the backend to curate user data
- Implemented future and loading structures to facilitate smooth transition between pages

Front End Team Lead | *Inrix Hackathon/Nest Notifications*

Nov. 2022 – Nov. 2022

- Developed in Inrix's annual Hackathon, utilizing Flutter and Dart to develop an innovative solution for tracking location for friends and family, while integrating Inrix's traffic data
- Demonstrated proficiency in Flutter and Dart programming languages, utilizing features and libraries to design and implement a highly functional and visually appealing user interface
- Bridged server side calls with client side using asynchronous structure and REST API

University Course Projects | *ARM asm, C, Verilog*

Sept. 2022 – Present

- Microprocessor Design – Developed with STMicro boards in ARM Cortex M-7
- Logic Design – Designed a 4-bit full adder using Verilog; Implemented Moore and Mealey state machines
- Data Structure – Implemented merge sort and timsort algorithms written in C

Discord Music Bot | *Python, REST API, asyncio*

Jan. 2022 – May. 2022

- Add-on in Discord to play music in voice calls using Python's asynchronous structure, as well as REST API
- Constructed real time event feedback loop with Discord's API

EXPERIENCE

Mentor

Aug. 2023 – Present

Mentor Collective, Santa Clara University

Santa Clara, CA

- Fostered five freshman mentees in pursuing academic readiness at Santa Clara University
- Provided academic support and advising for incoming freshmen as a certified mentor

Barista

Dec. 2021 – Aug. 2023

Dolce Neve Gelato

Austin, TX

- Prepared a wide range of hot espresso beverages, managed store including check out, cash registration, food preparation, and cleaning in a part time job
